CYBER DEFENSE powered by CyFlare

Cyber Defense Exposure Management

When it comes to your perimeter, attack surface and overall security, your online presence matters. From websites they visit and forms submitted to emails sent and everything in between, maintaining an ongoing awareness of all your employees' activity can seem like an impossible task for your IT team.

Our Cyber Defense Exposure Management solution, powered by CyFlare, is a continuous threat exposure management (CTEM) platform that provides vulnerability assessments of your digital perimeter. It enables you to quickly identify and resolve external vulnerabilities and potential attack vectors before they can affect your business.

Fully managed by our Security Operations Center (SOC),* this solution provides continuous visibility.

Key Benefits

Enhanced network security

We'll minimize your perimeter and attack surface by shutting down unnecessary systems and services while resolving and securing actual vulnerabilities. This solution can reduce your organization's digital footprint by up to 50% or more, drastically lowering your likelihood of a breach.

Simplified network management

A team of specialized experts will help you safeguard your digital and physical assets for you, allowing you to spend less time managing cyber risks and more time focusing on growing your business.

Greater performance visibility

You'll have access to our Cyber Defense One portal, which provides high visibility into data across clouds, networks, endpoints and applications. A single portal for frictionless SOCaaS enablement including live chat, analytics, reporting and more.

Dedicated support and monitoring

Specialized experts provide complete care to support your everyday needs. You will have a dedicated Crown Castle Client Service Manager focused on providing you with ongoing account support, including billing, account changes and renewals, quarterly business reviews and more. At the same time, we also provide specialized consultation, monitoring and communication expertise from your dedicated CyFlare Customer Success Manager and Systems Engineer.

Lower capital and operational cost

With Cyber Defense, you'll receive 24/7/365 monitoring and guidance where and when you need it, without the large upfront costs required for in-house management. This allows you to allocate resources to your most pressing business needs while minimizing operational costs.

Technical Specifications

FEATURES	CYBER DEFENSE EXPOSURE MANAGEMENT
